

# Social Domination

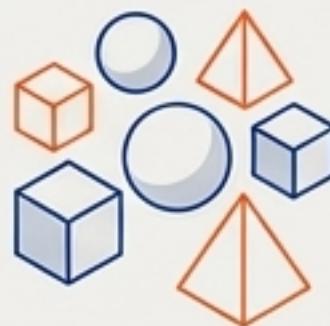

The AI-Powered Engine to Amplify Your  
Message and Reclaim Your Time.

# You're creating great content. So why does growth feel like a battle?

# The modern creator's dilemma: To be visible, you have to be everywhere.

## Platform Proliferation

The average business now manages dozens of platforms, each demanding unique formats and strategies.

## Incessant Demand

Algorithms are designed to reward constant, daily activity, creating an endless cycle of content production.

## Diminishing Returns

More manual effort—more posts, more platforms—no longer guarantees proportional growth or reach.

# The “hustle” is a strategic bottleneck costing you more than just time.

## Nete Haas Grotesk The Time Cost

An estimated 15+ hours per week are lost to repetitive, low-leverage tasks: reformatting, copying, pasting, and manual scheduling.

## Neue Haas Grotesk The Opportunity Cost

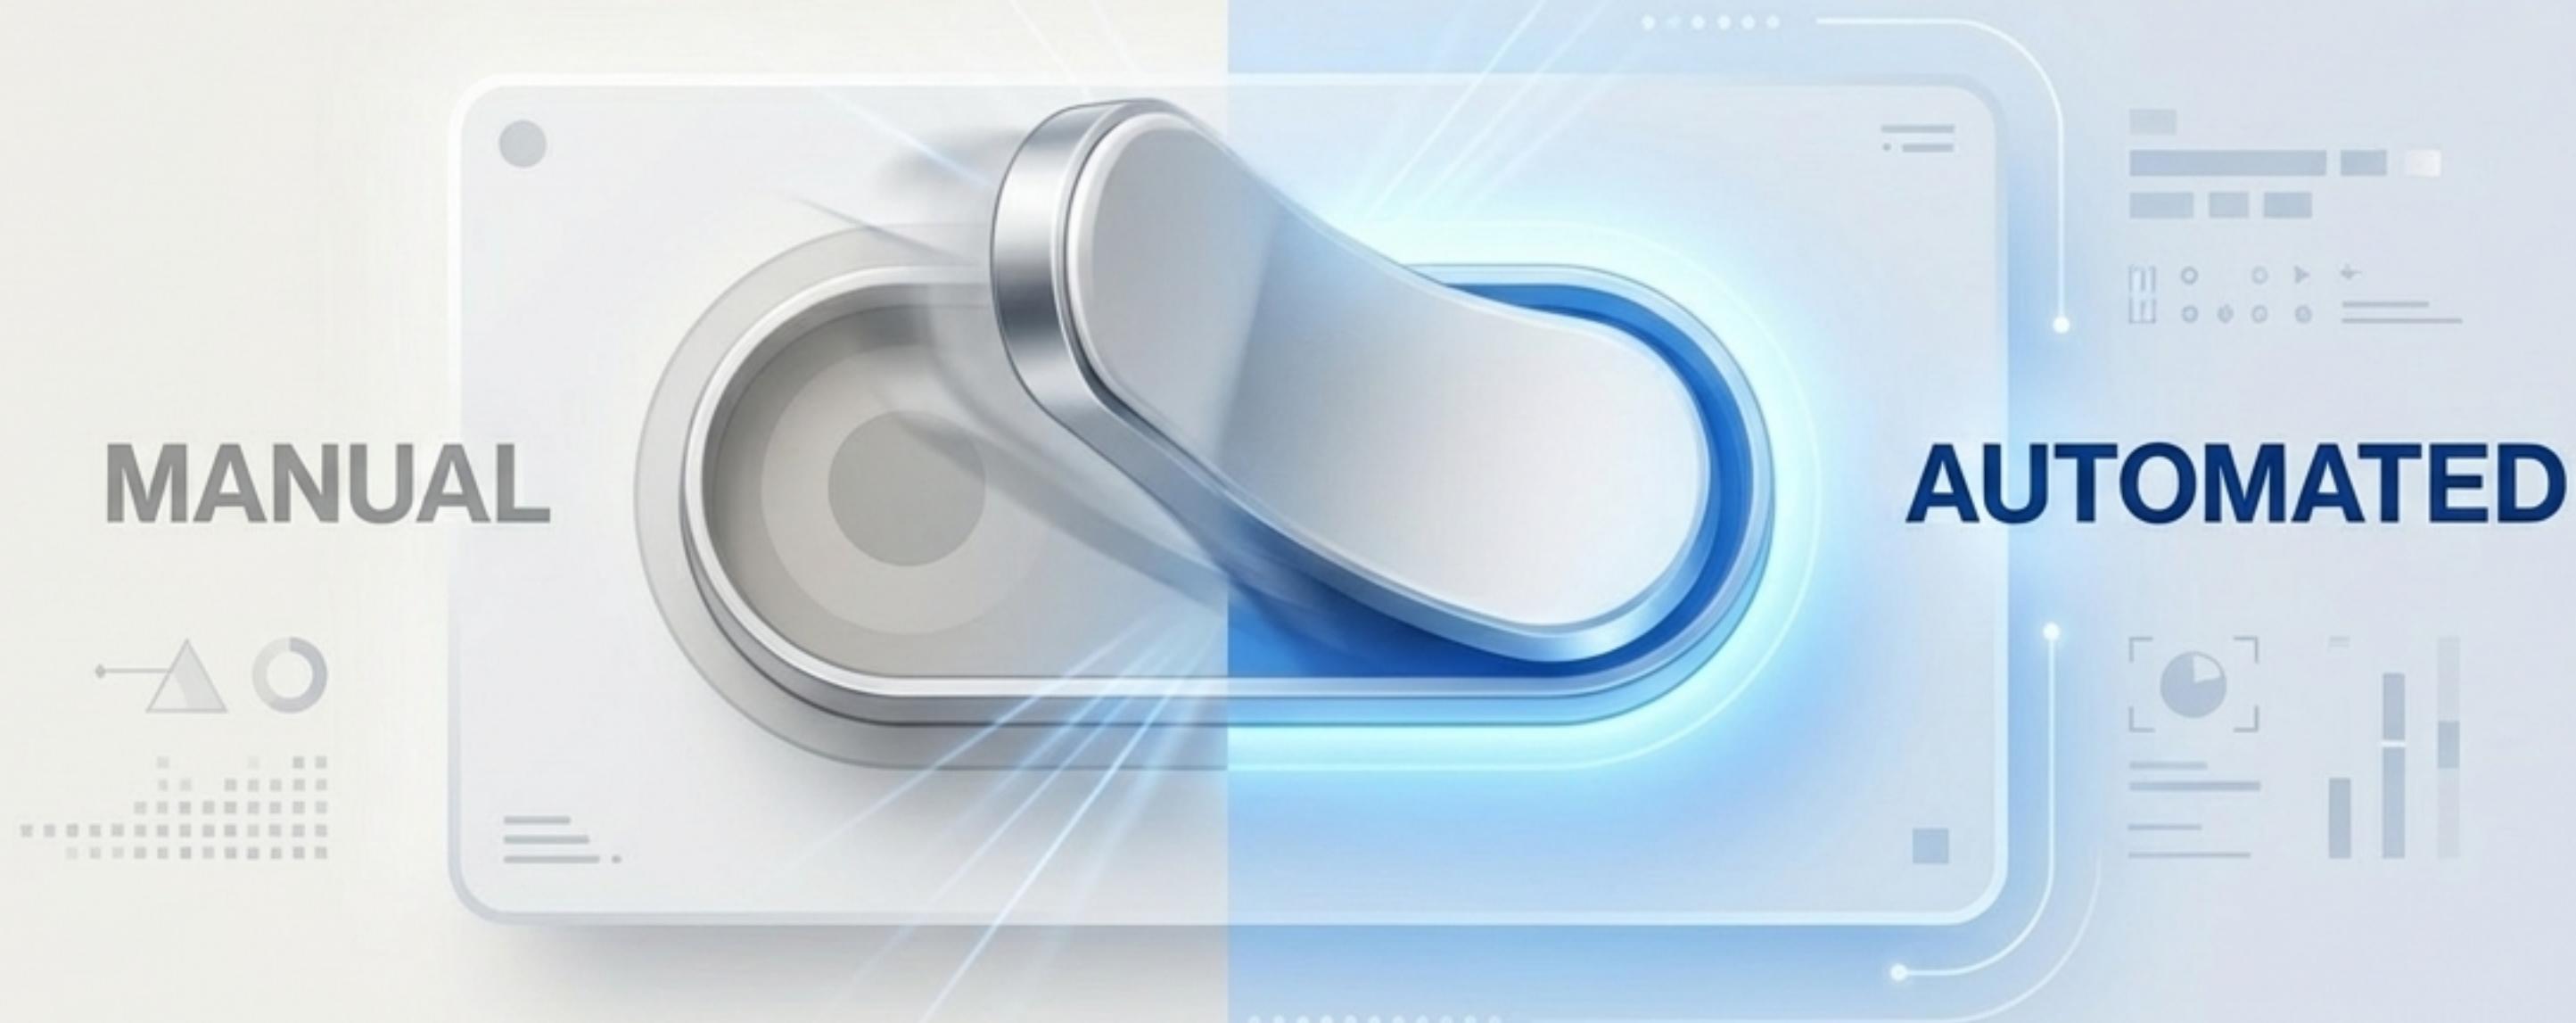

Every hour spent on manual posting is an hour \*not\* spent on strategy, client relationships, or closing new business.

## Neue Haas Grotesk The Creative Cost

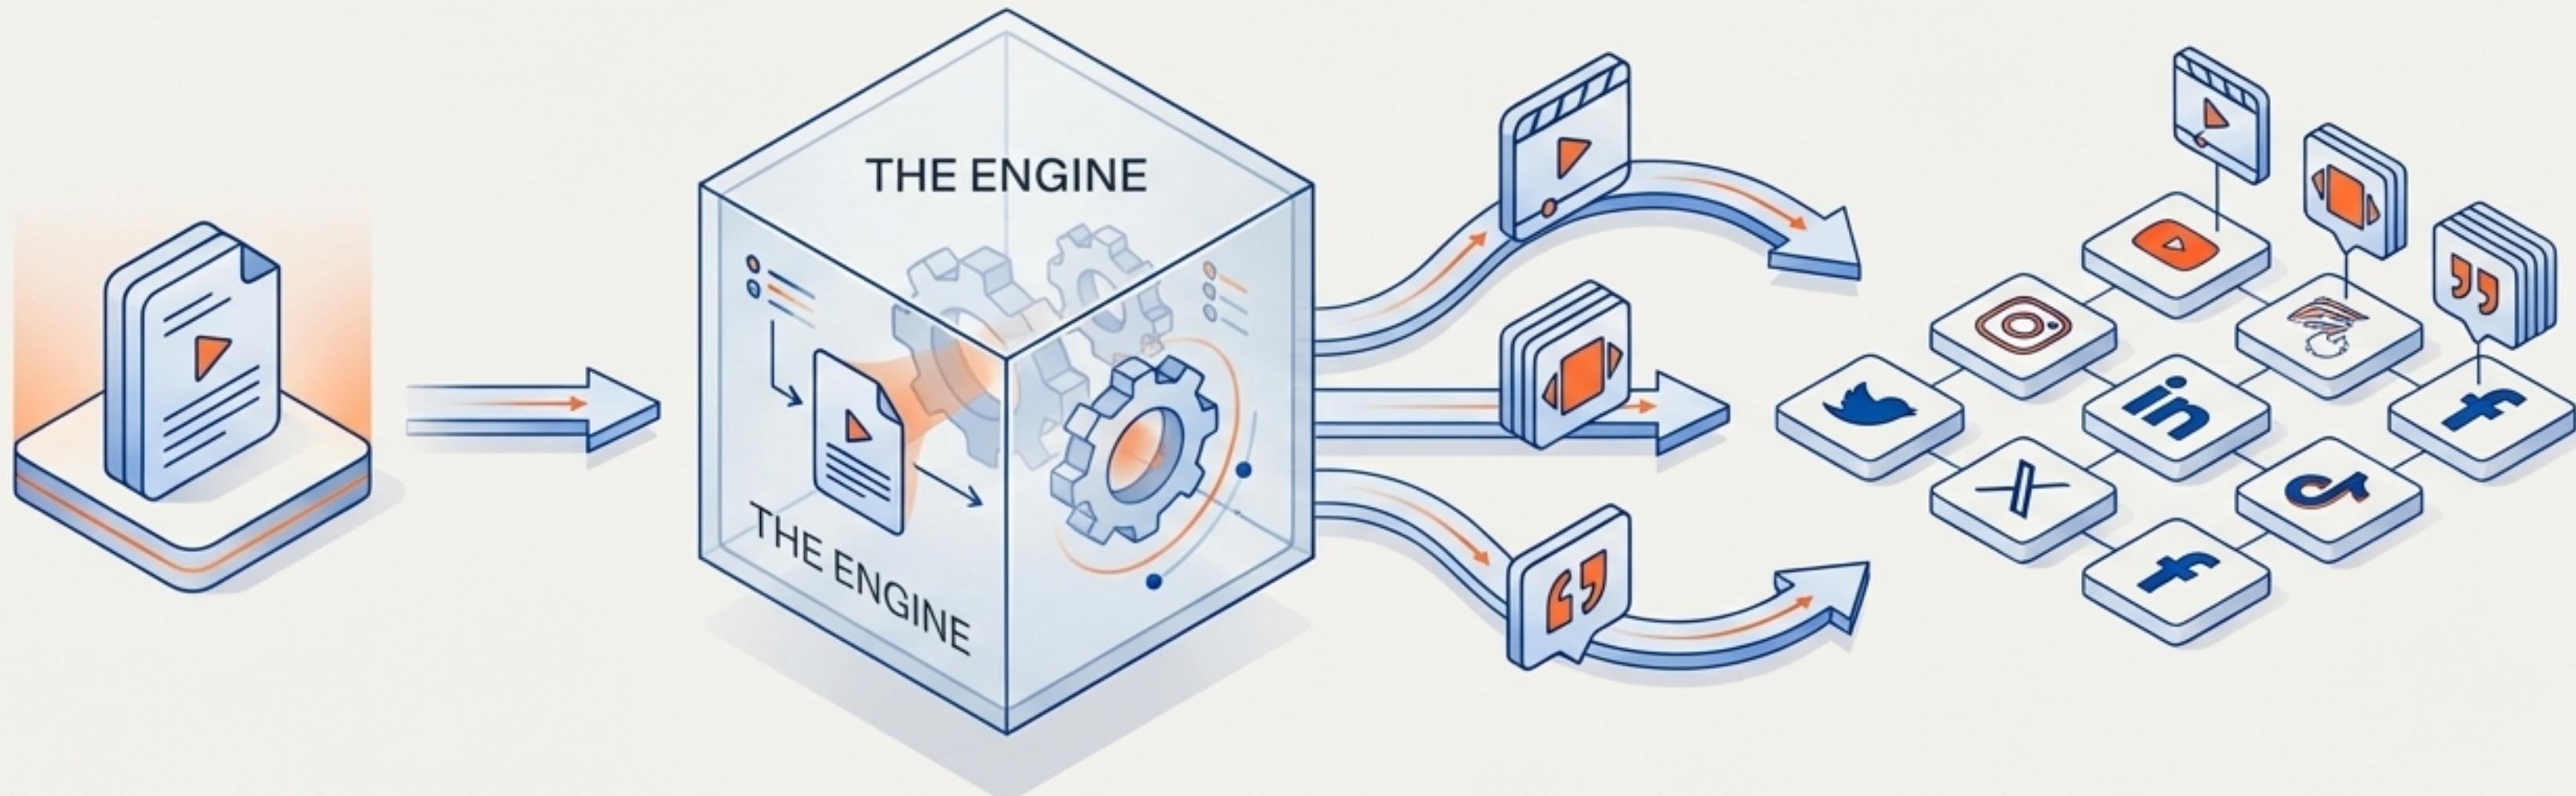

Burnout is the enemy of innovation. Your most valuable strategic thinking is sacrificed to feed “the grind.”

# Stop Posting. Start Publishing.

Shift from manual labor to an intelligent, automated system.

# We build your custom AI-powered system that transforms, multiplies, and distributes your content—on autopilot

## 1: ONE INPUT

Create your core content once (e.g., a blog post, video, or podcast episode).

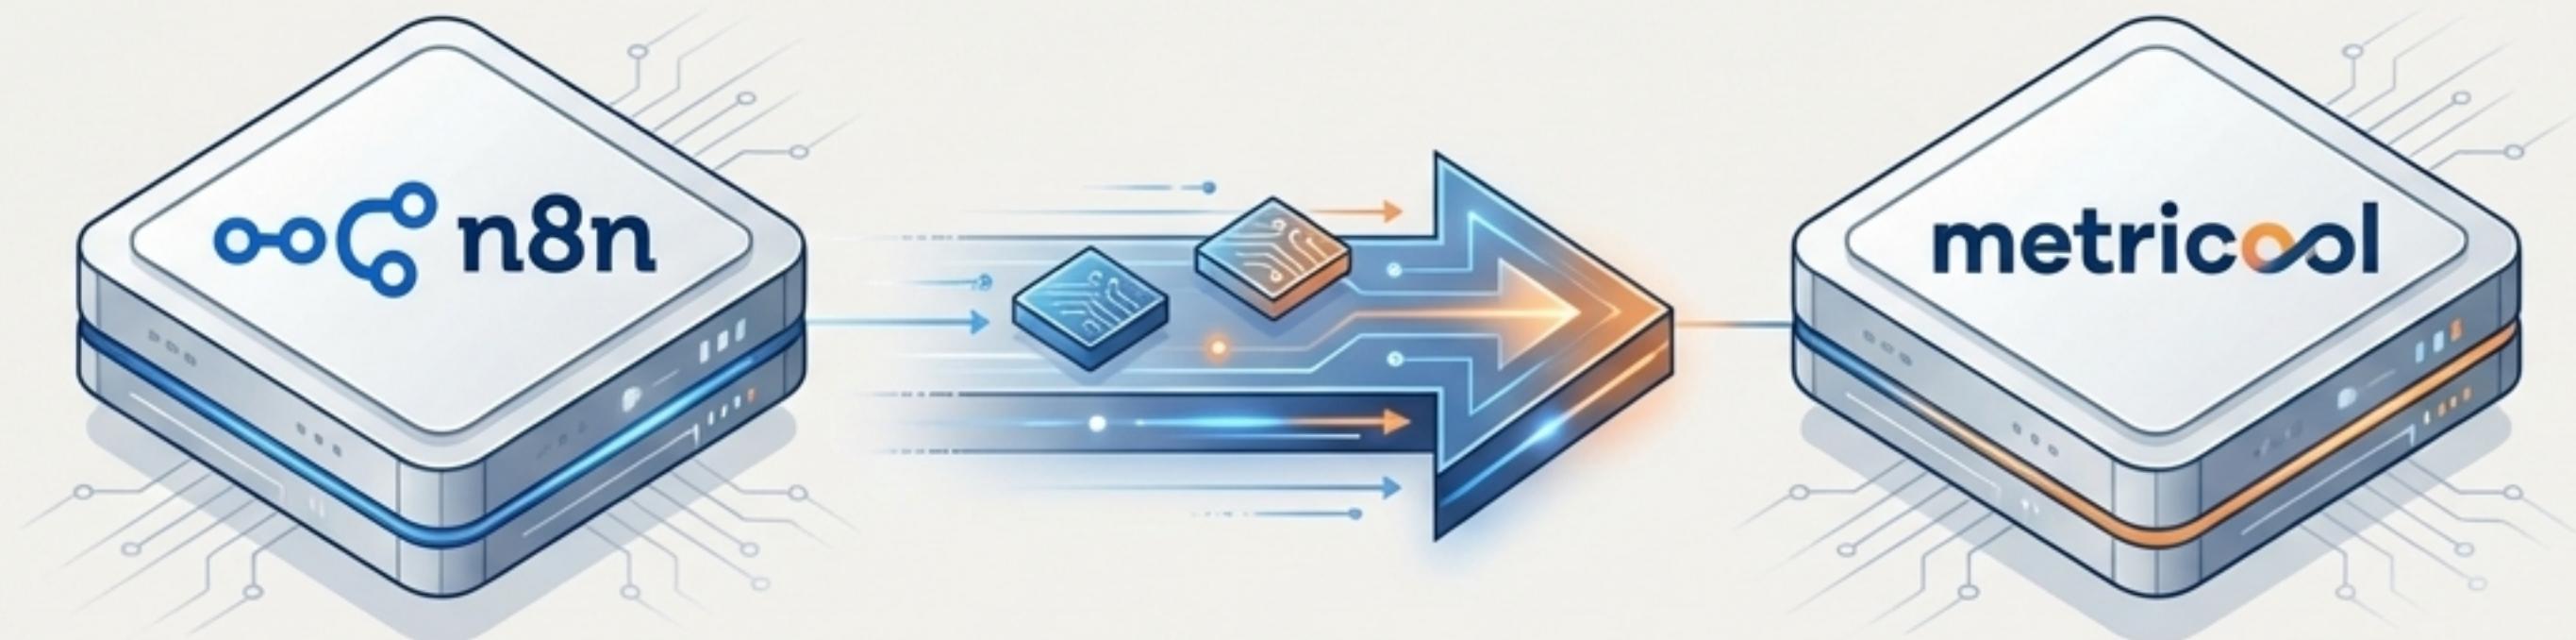

## 2: AUTOMATED MULTIPLICATION

The engine automatically analyzes, extracts, and reformats your content into dozens of platform-native assets: short-form videos, quote cards, carousels, threads, and more.

## 3: INTELLIGENT DISTRIBUTION

The system schedules and publishes every asset across all your channels at the optimal times for maximum engagement.

# Powered by a robust, best-in-class automation stack.

## The Brains

Custom n8n workflows connect your content sources (blog, podcast, video) and automatically run them through AI models to generate dozens of unique assets. This is the heart of the multiplication engine.

## The Distributor

Metricool flawlessly bulk-schedules and publishes all generated assets to your entire social ecosystem, providing unified analytics to track performance from a single, powerful dashboard.

# Case Study: The TetraBrame / Rabbenou Music Project

## The Challenge

A small team needed to launch a catalogue of **400 songs** across **44 separate social media accounts** (including 22 YouTube channels, 5 Instagram accounts, and 5 TikTok profiles) with extremely limited time and resources.

## The Solution

We implemented the Social Domination Engine. A core **n8n workflow** automated the creation of hundreds of unique lyric videos and quote cards. **Metricool** then **Metricool** then bulk-scheduled and distributed these assets across all 44 platforms.

## The Results

**500,000+**  
Streams Across All Platforms

**700+**  
Spiritual Books Funded via 20% Ma'aser

**90%**  
Reduction in Manual Admin Time

# Ready to activate your Content Multiplication Engine?

## AMPLIFY

(Starter)

Solopreneurs & Creators  
Tiempos Text

- Foundational engine setup for up to 10 social profiles.
- Core content distribution workflow.
